Strikers

Strikers operate parallel to NH fuse-links. Strikers are no fuse-links, meaning they have to be used in combination with NH fuse-links

Elegard blown fuse monitoring can be used with any standardised NH fuse-link with live gripping lugs size 00-4. An interchangeable striker unit (shown above) is electrically connected with the live gripping lugs by the spring contacts of the Elegard holder. The NH fuse link acts as a carrier and when it operates, the Elegard striker releases a pin, operating a micro switch.
