

MV NETWORK UPDATE JULY 2014

NEW ZEALAND INSULATORS

Proud of our 90 year history and involvement with the New Zealand electrical industry.

New Zealand owned and operated with a history spanning more than 90 years of proud service to the New Zealand electrical industry.

We operate our business and manufacturing divisions from our significant (68,900 square metre) site in Temuka, South Canterbury and also a modern distribution centre in Kumeu (25km north west of Auckland's CBD)

Based on our reputation and the understated quality and durability of the NZI products we continue to manufacture a suite of HV, MV & LV electrical insulators and products.

NZI also represents leading agency brands in New Zealand including DTR Electric (Korea), Payer (Canada), GIG (Ukraine), AX (made for NZI), Avon Industries (NZ), NGK Stanger (Australia), Fulton Industries (Australia), Red Spot (UK), Cooper Bussmann (India/UK) & Efen (Germany).

But we'd like to emphasise that New Zealand Insulators is a local manufacturer and all insulators branded "NZI" are made in Temuka – not imported, but actually made here, in the South Island of New Zealand.

We also own and operate our own opencast mines, we're flexible enough to make specialised products in short-run quantities. We supply the New Zealand and International market who continue to trust NZI product made in Temuka South Canterbury, New Zealand.
