

LONG AND CRAWFORD SWITCHGEAR

New Zealand Insulators is proud to be a Business Partner with UK based Long Controls.

Long Controls have developed service kits for the ever reliable Long and Crawford Switchgear range.

Many of these units have been in service for over fifty years throughout New Zealand.

The cost to replace these units can be prohibitive, but with the in situ service regime developed by Long Controls, the units can be overhauled and twenty years added to their service life.

Why don't you give your Long and Crawford RMU asset base a well deserved face lift, extending its asset life!

All spares offered are original Long and Crawford factory genuine OEM and therefore DO NOT compromise original factory BS2631 certification, plant integrity and personal safety.

All Long and Crawford T3/T4GF3, GF3, J3 J4 spares are stocked and available from our Temuka warehouse, as well as specialist tools and test equipment. For further details and advice contact our sales team.

New Zealand Insulators, proudly made in Temuka, South Canterbury, New Zealand.

Contact us now for information on our products, to receive samples, and/or request a quote on any of our NZI or agency products.
