

MV NETWORK UPDATE JULY 2021

Environmental sustainability is about making responsible decisions that will reduce any negative impact on the environment.

As New Zealand's only producer of porcelain insulators we continually make honest, accountable, environmentally sustainable decisions to support our 97 year New Zealand owned and operated manufacturing facility.

At NZI, we take Extended Producer Responsibility seriously with all of the porcelain insulators produced. Our EPR approach carries significant responsibility for the treatment and recycling of any end of use NZI porcelain insulators.

NZI provides incentives to prevent waste when insulators reach end of life, promote product design to support the environment and support all recycling and materials management goals to make all producers accountable when their products reach end of life.

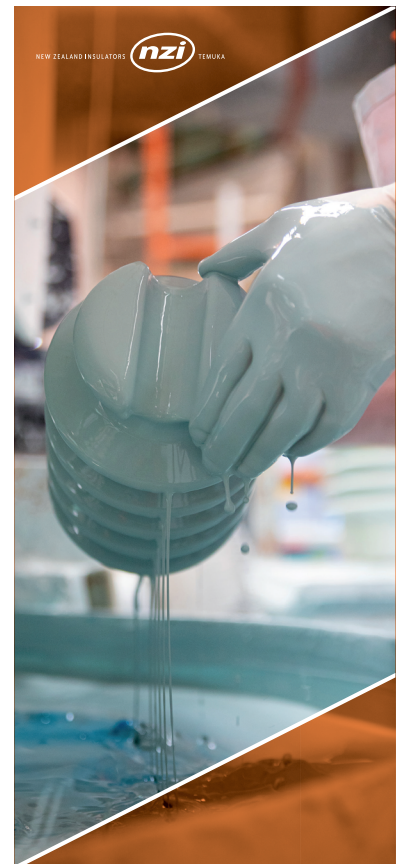

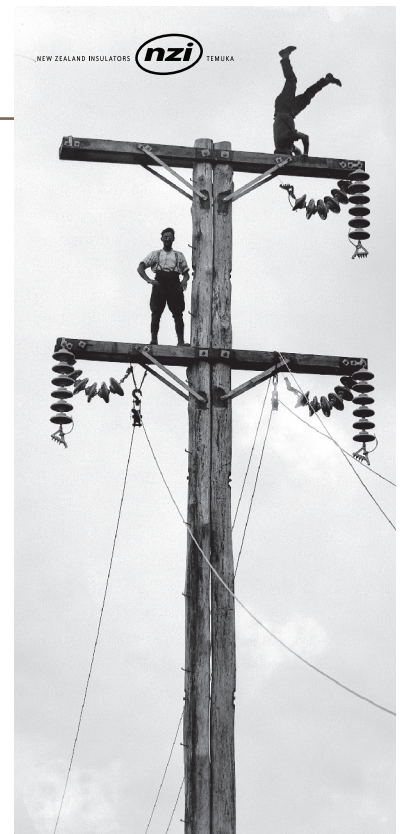

NZI porcelain is a great "total value proposition" for the sourcing of quality insulators and providing an environmentally sustainable, total lifecycle management solution that can't be replicated by other insulator suppliers.

Contact us to find out more on how NZI can recycle your old end of life insulators and improve your network reliability.

New Zealand Insulators, proudly made in Temuka, South Canterbury, New Zealand.

Contact us now for information on our products, to receive samples, and/or request a quote on any of our NZI or agency products.
